## TEMPLATE DOWNLOAD

On each product page, the templates (in. Psd) for paging the album core as well as the masks for creating images for all customized accessories are available to download on the DOWNLOADS tab.

PAGING MEASUREMENTS

Before you start paging check the measurements for the selected format. All files should be created in exactly these measures, since they all include a safety margin of approximately 0.2 inches all around the page. The templates available for download include tabs that mark this area. When sending files to the production of Press Albums and Fineart Duo Albums, the files continue to be provided in double-page, knowing that either at the beginning and at the end a blank page will be included.

	ORIENTATION	MAIN ALBUM	PAGING MEASUREMENTS
	Vertical	8,7x5,9 inches	17,3x5,9 inches
	Square	8,3x8,3 inches	16,7x8 inches
	Vertical	9,1x12,2 inches	17,7x12 inches
	Horizontal	12,2x9,1 inches	23,6x8,9 inches
	Vertical	9,8x11,8 inches	20x12 inches
	Horizontal	11,8x9,8 inches	24x10 inches
	Square	11,8x11,8 inches	24x12 inches
	Vertical	11,8x15,7 inches	23,6x15,7 inches
	Horizontal	15,7x11,8 inches	31,5x11,8 inches
	Vertical	13,4x15,7 inches	26x15,7 inches
	Horizontal	15,4x13 inches	29,9x12,8 inches
	Square	13,8x13,8 inches	27,6x13,8 inches
	Square	15x15 inches	29,9x15 inches
	Vertical	11,8x17,7 inches	23,6x17,7 inches
	Horizontal	17,7x11,8 inches	35,4x11,8 inches
	Vertical	13,8x17,7 inches	28,0x18,1 inches
	Horizontal	17,7x13,8 inches	35,8x13,8 inches

PAGING/ EDITING

After downloading the templates or masks you should open them with Photoshop or any other image editing program and follow the instructions in the downloaded file with the template.

All files have guidelines delineating the area that can be cut (bleed). Accurate positioning of images is essential for the correct printing, avoiding unwanted margins or overcropped images.

COLOUR PROFILE / FILES

Dreambookspro printing equipment uses the SRGB colour profile. The same should be applied / embedded in the image file in Photoshop in RGB colour mode. The files must be created at 254 dpi's (templates available for download have been configured with this resolution) and saved in JPG or PSD, with quality 12.

UPLOAD

Access the Express, select the products and their respective settings and upload your files. The platform for sending files is an entirely online device, with no need for downloading and installation.
It is advisable that you use Google Chrome.
